## TECHNICAL SKILLS

### Backend

PHP / Laravel Python / FastAPI  
C# / ASP.NET Node.js Go  
TypeScript

### Frontend & Mobile

Vue.js / Nuxt React / Next.js  
React Native Angular JavaScript  
Bootstrap Tailwind CSS  
Flutter / Dart

### Databases

PostgreSQL PL/pgSQL MySQL  
SQL Server Informix MongoDB  
Redis

### Cloud & DevOps

AWS EC2 S3 RDS / Aurora  
ECS Docker Kubernetes  
GitHub Actions Azure DevOps  
CI/CD

### Infrastructure

Linux (Ubuntu/Debian) Nginx  
Windows Server / IIS Git

## EDUCATION

**B.S. in Systems Engineering**  
UNAC · 2017 - 2021 · Top third of class

**Database Specialization**  
CIBERTEC · 2024

**Advanced English (Level 10)**  
ICPNA · 2023 - 2026 · In progress

## LANGUAGES

Spanish Native  
English Advanced (in progress)

## SOFT SKILLS

Proactivity · Technical leadership ·  
Teamwork · Resilience · Accountability

## PROFESSIONAL SUMMARY

Systems Engineer with 4+ years of experience as a Full Stack Developer and Database Analyst in the logistics and mining industries. Specialized in REST API design, relational and NoSQL database modeling and optimization, stored procedures, vector search, and data modernization, including the migration of legacy processes from Informix to PostgreSQL on AWS Aurora. Experienced across the full lifecycle: backend, frontend, containerization with Docker and Kubernetes, and deployment on AWS and Azure with CI/CD.

## WORK EXPERIENCE

### Urbano Express

Feb 2024 - Present

#### Database Analyst

Oct 2025 - Present

- Lead the migration of logistics processes from **Informix to PostgreSQL on AWS RDS (Aurora)**: modeling tables, indexes, and views, and migrating and loading data between both engines.
- Develop **stored procedures and PL/pgSQL functions** for the Billing, Collections, and Customer Experience teams.
- Configured encrypted **TLS** database connections and implemented **vector search** (semantic similarity) on PostgreSQL.

#### Full Stack Developer

Feb 2024 - Sep 2025

- Designed and built **REST APIs with Laravel and FastAPI** to integrate internal systems with partners such as **LG, Ripley, and Mercado Libre**.
- Containerized applications with **Docker and Kubernetes** and automated deployments on **AWS (EC2, S3, RDS, ECS)** with CI/CD in GitHub Actions.
- Managed Linux servers with Nginx and built interfaces with **Vue/Nuxt, React/Next.js, Angular, and React Native**.

### Maprosoft

Dec 2021 - Jan 2024

#### Full Stack Developer · Lima, Peru

- Automated operational processes for mining clients (**Summa Gold and Shougang**), including a **real-time dispatch system with WebSockets** for fleet control.
- Built interactive dashboards and geological maps with **AmCharts4, ApexCharts, Mapbox, and Leaflet** to visualize mining KPIs.
- Built the backend with **ASP.NET and SQL Server** (stored procedures), with continuous integration in Azure DevOps and deployment on Windows Server / IIS.

Stack: C#, ASP.NET, SQL Server, JavaScript, DevExpress, Azure DevOps

### Universidad Nacional del Callao

Sep 2021 - Nov 2021

#### IT Support · Virtual Education Office

- Maintained and set up computer equipment and managed institutional email accounts.

### Fénix Logistic S.A.C.

Jun 2020 - Jan 2021

#### Jr. Programmer Analyst · Lima, Peru

- Developed the company logistics system with **Laravel and Vue.js**, integrated with **NubeFact** for SUNAT-compliant electronic invoicing (Peru tax authority), and deployed it to a web server.
